

I don't believe [that he wants me [to think [that he didn't (do) it.]]]

The diagram illustrates the nested structure of the sentence. It features three levels of nesting, each represented by a pair of square brackets. A horizontal line with three upward-pointing arrows connects the closing brackets to their corresponding opening brackets. The first arrow points from the closing bracket of the innermost clause ('that he didn't (do) it.') to its opening bracket ('that'). The second arrow points from the closing bracket of the middle clause ('to think [that he didn't (do) it.]') to its opening bracket ('to'). The third arrow points from the closing bracket of the outermost clause ('[that he wants me [to think [that he didn't (do) it.]]]') to its opening bracket ('[that').
